Examiner's Amendment and Reasons for Allowance

1. Applicant's amendments filed June 1, 2011 are acknowledged. Claims 2, 11-19, and 24-29 have been cancelled. Claims 1, 3-10, and 20-23 are pending.

Information Disclosure Statement

2. All of the references listed on the IDS filed 8/11/2011 have been marked as not considered by the examiner because each of those references was previously listed on an IDS filed 5/11/2011. Each of those references was marked as considered by the examiner on the IDS filed 5/11/2011.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
4. Authorization for this examiner's amendment was given in a telephone interview with Daniel Pereira on August 31, 2011.
5. The application has been amended as follows:
6. Amend claim 1 as follows: A method for cleaning and coating a glass substrate, the method comprising:

generating a plasma from a gas mixture comprising predominantly oxygen with at least one linear ion source, wherein the linear ion source generates a collimated beam of ions;

[[-]] subjecting at least one surface portion of a glass substrate optionally associated with a layer to said plasma to at least partly eliminate, by chemical reaction, the soiling matter possibly adsorbed or located on said surface portion ~~without removing material from the surface portion of the glass substrate~~; and

coating said at least one surface portion of the glass substrate subjected to the plasma by depositing at least one thin multilayer without breaking vacuum, wherein said at least one thin film multilayer ~~is for~~ provides at least one of solar control, [[a]] low emissivity, electromagnetic shielding, heating functionality, hydrophobic properties, hydrophilic properties, photocatalytic properties, mirror properties, antireflection properties, electrochromic properties, electroluminescent properties, and photovoltaic properties.

7. Cancel claims 9 and 20.

Reasons for Allowance

8. The following is an examiner's statement of reasons for allowance: the reviewed prior art does not teach or suggest the subject matter recited by claim 1, the independent claim. The most relevant prior art to claim 1 is the combination of U.S. 2004/0020761 by Thomsen (Thomsen '761) in view of U.S. 2003/0064198 by Thomsen (Thomsen '198) in view of U.S. 2002/0012798 by Veerasamy that was used to reject

claim 1 in the examiner's Non-Final Rejection dated 2/10/2011. The combination of Thomsen '761 in view of Thomsen '198 in view of Veerasamy fails to teach subjecting a glass substrate to plasma generated from a gas mixture comprising predominantly oxygen and then coating the glass substrate with a multilayer. The reviewed prior art fails to provide motivation to modify the combination of Thomsen '761 in view of Thomsen '198 in view of Veerasamy in order to arrive at the invention recited by claim 1.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to RYAN COLEMAN whose telephone number is (571)270-7376. The examiner can normally be reached on Monday-Friday, 9-5.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Kornakov can be reached on (571)272-1303. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
